PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building responsive, accessible web applications with React, TypeScript, and Tailwind CSS. Built the frontend of a role-based, bilingual (English/Arabic, RTL) B2B supply platform, and delivered client websites, an e-commerce storefront, and a finance dashboard. Skilled in REST API integration, server-state management with TanStack Query, real-time features with Socket.IO, and Firebase. Focused on clean, maintainable code and interfaces that hold up in production.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python
Frameworks & Libraries: React, Next.js, React Native, React Router, TanStack Router, Framer Motion, Recharts, Radix UI, Leaflet
State & Data: TanStack Query (React Query), Zustand, Redux, Axios, REST APIs, Socket.IO
Styling & UI: Tailwind CSS, daisyUI, Responsive Design, Web Accessibility, Internationalization (i18next), RTL Layouts, Dark/Light Theming
Backend & Databases: Node.js, Firebase, PostgreSQL, Authentication
Tools: Git, GitHub, GitLab, Vite, WordPress, Linux, Notion

PROFESSIONAL EXPERIENCE

Frontend Developer **2025 – Present**
PharmaLink (B2B Pharmaceutical Supply Platform) *Remote*

- Build the React and TypeScript frontend for a platform where pharmacies order stock from warehouses, covering ordering, fulfillment, offers, invoicing, and chat.
- Designed role-based routing for pharmacy, warehouse, and admin workspaces with lazy-loaded pages.
- Manage server data with TanStack Query and session/UI state with Zustand, keeping orders, offers, and invoices consistent across views.
- Implemented full English/Arabic localization with i18next and a true right-to-left (RTL) layout.
- Integrated Socket.IO for real-time chat and notifications, Leaflet maps for partner locations, and admin tools for partner verification and user management.

Freelance Frontend Developer **Nov 2023 – Present**
Self-employed *Remote*

- Deliver responsive landing pages and web apps for clients using React, TypeScript, and Tailwind CSS.
- Convert UI/UX designs into mobile-first, component-based interfaces that work across browsers.
- Integrate REST APIs and Firebase for authentication, real-time data, and cloud storage, while improving performance and accessibility.
- Own projects end to end: requirements, development, testing, deployment, and ongoing maintenance.

PROJECTS

LUXE – E-commerce Storefront mehdiazzam.github.io/LUXE
Tech: React, TypeScript, TanStack Router, TanStack Query, Firebase, Tailwind CSS, Framer Motion

- Built a complete shopping flow from landing page to order confirmation, with wishlist and cart kept in sync through Firebase and TanStack Query.

Vaultify – Personal Finance Dashboard mehdiazzam.github.io/Vaultify
Tech: React, TypeScript, Zustand, TanStack Query, Firebase, Recharts, Tailwind CSS

- Developed a finance app for accounts, transactions, budgets, savings goals, and loans, with responsive charts and dark/light themes.

4TRADERS – Arabic Forex News Website mehdiazzam.github.io/4Traders
Tech: React, TypeScript, Tailwind CSS, daisyUI

- Built an RTL news site with a price ticker, category filtering, and article pages, using bilingual typography for Arabic text and Latin market data.

EDUCATION

B.Sc. in Information Technology Engineering – Syrian Virtual University (SVU) **2022 – Present**

LANGUAGES

Arabic (Native), English (Professional Working Proficiency)
